

## EDUCATION

---

### Stanford University

Stanford, CA

Ph.D. in Electrical Engineering

- Advisors: Profs. Ram Rajagopal, Philip Levis
- Areas of Focus: Datacenters, Energy Systems, Cloud Computing

### University of Cambridge, Churchill College

Cambridge, UK

M.Phil in Advanced Computer Science

July 2024

- Thesis: “Online Workload Allocation and Energy Optimization in Large Language Model Inference Systems”
- Advisors: Profs. Richard Mortier, Srinivasan Keshav

### Clemson University

Clemson, SC

Dual B.S in Computer Engineering and Mathematical Sciences

May 2023

- Thesis: “Green HPC: Optimizing Software Stack Energy Efficiency of Large Data Systems”
- Distinctions: Norris Medal, Summa Cum Laude, General and Departmental Honors

## RESEARCH EXPERIENCE

---

### Stanford University, Graduate Research Student

Fall 2024–Present

Advisors: Ram Rajagopal, Philip Levis

- Developed load models for LLM inference datacenters.
- Designed software/hardware for mitigating transients in large-scale training jobs.

### Microsoft Azure Research, Research Intern

Summer 2025

Advisors: Fiodar Kazamiaka, Chaojie Zhang, Alok Khumbare, Ricardo Bianchini

- Explored and aided in design for power infrastructure for inference data centers.

### Argonne National Lab, Graduate Research Assistant

Summer 2024

Advisors: Sheng Di, Franck Cappello

- Quantified the energy-savings that lossy compression can introduce for exascale computing systems.

### University of Cambridge, Graduate Research Student

Fall 2023–Summer 2024

Advisors: Richard Mortier, Srinivasan Keshav

- Developed an energy-aware online scheduling framework for LLM inference.

### Argonne National Laboratory, Graduate Research Assistant

Summer 2023

Advisors: Sheng Di, Franck Cappello, Kibaek Kim

- Principal investigator for FedSZ: a lossy compression scheme to cut federated learning communication overhead.

### Tesla, Inc., Software Engineering Intern

Summer 2021

Energy IoT Cloud Platforms Team

- Expanded functionality for the California Virtual Power Plant.

### Clemson University, Undergraduate Researcher

Fall 2020 –Summer 2023

Advisor: Jon Calhoun

- Explored lossy compression and checkpointing for HPC towards cutting I/O energy and runtime overhead.

## TEACHING

---

- **Undergraduate Teaching Assistant** at Clemson University Fall 2020 - Fall 2021  
*Held office hours, graded, and led class sessions for over 50 students each semester in ENGR 1410.*

## SKILLS

---

- **Programming Languages:** C/C++, Python, Scala/Java, VHDL, FORTRAN
- **Tools/Software:** MPI, OpenMP, CUDA, PyTorch, MATLAB, L<sup>A</sup>T<sub>E</sub>X, Git

## HONORS AND AWARDS

---

- **Churchill Scholarship** 2023
- **Clemson University Norris Medal** 2023
- **National Scholars Program** 2019
- **Goldwater Scholar** 2022
- **Eagle Scout Award** 2016
